# 2008 Deloitte Technology Fast 500

## Research and Eligibility

The Deloitte Technology Fast 500 is a ranking of the fastest growing technology, media, telecommunications and life sciences companies in North America based on percentage fiscal year revenue growth over five years (2003-2007).

Sources for public and private companies that make the list include public company databases, Deloitte's 10 regional Technology Fast 50 programs in North America and direct nominations.

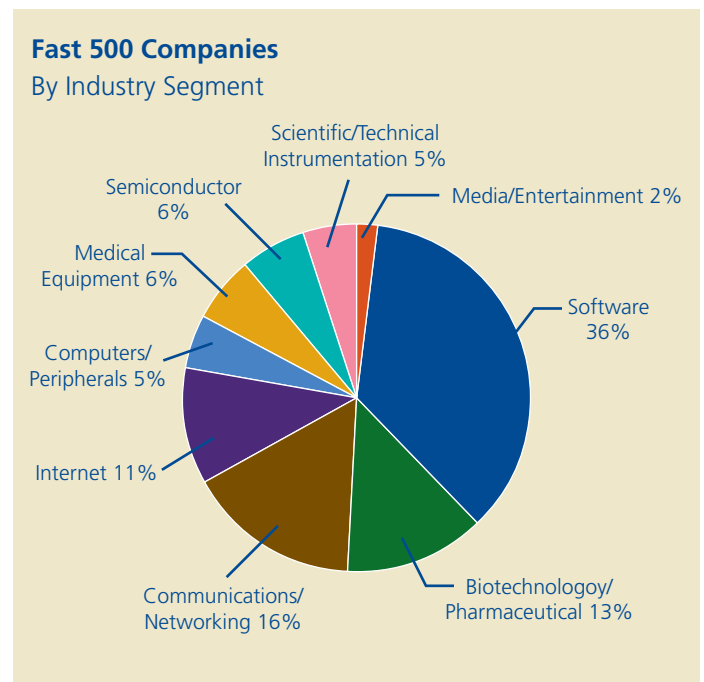

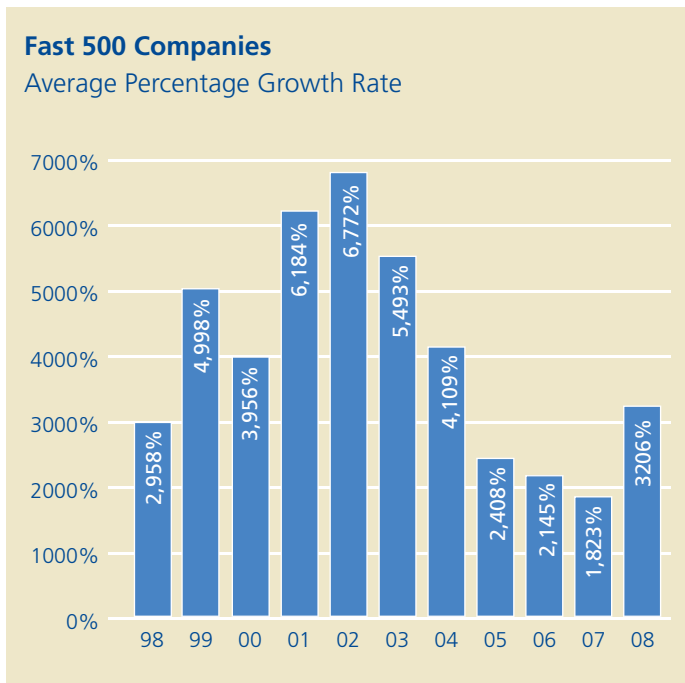

To be eligible for the Technology Fast 500, a company must meet the following criteria:

1. Own proprietary technology or proprietary intellectual property that contributes to a significant portion of the company's operating revenues or devotes a significant proportion of operating revenues to research and development of technology. Using other companies' technology or intellectual property in a unique way does not qualify.
2. Meet minimum operating revenue requirements:
  - 2003 operating revenues must be at least \$50,000 USD or \$75,000 CD.
  - 2007 operating revenues must be at least \$5 million USD or CD.
3. Be in business a minimum of five years.
4. Be headquartered within North America.

## Innovation Drives Highest Tech Sector Growth Rates Since 2002

At a time when everyone is singularly focused on the economy, it might be helpful to take a step back and look at how innovation is meeting reality in the technology sector. This industry experienced its own high-flying days of giddiness with the dot.com boom, only to come crashing down. Now, after some initial struggles, technology companies are turning innovation into solid, consistent growth. And growth is what we celebrate in our 14th annual Deloitte Technology Fast 500. Indeed, 2008 marks the first year that average growth for our Fast 500 companies has increased since 2002, a growth rate that is nearly double this year over 2007.

Who is leading this charge? This year, our Fast 500 winner is Hughes Communications Inc., which experienced a growth in revenues of 138,762 percent over five years—the highest number we've seen since Google topped the list in 2004. Overall, our Fast 500 companies reached 3,206 percent average growth, up from 1,823 percent last year. Some, like Apple, Yahoo!, and Google, are brand-name industry giants whose creativity and management savvy enable them to continue to achieve high growth rates. Others are smart young companies that have launched themselves into high growth relative to where they started only five years before. It's the dual commitment to good business practices and innovation—whether you're a large established brand or a small rising star—that send you to the Fast 500 list and keep you there for years to come.

### Here Come the Numbers

Our top five companies experienced an average revenue growth rate of 90,540 percent over five years, up from 41,093 percent in 2007. Revenue growth for the 2008 Fast 500 companies ranged from 241 percent to 138,762 percent, with an overall average growth of 3,160 percent, up from 1,823 percent in 2007.

Average revenues in 2008 were \$310.9 million compared with \$115.7 million in 2004. In the five-year period since the 2004 list, average revenues were \$212.7 million with an average revenue growth of 2,705 percent. In 2002, just following the dot.com crash and 9/11, average revenues were \$153.2 million and the average growth rate was 6,771.55 percent.

So, how does the Fast 500 compare with U.S. growth, or GDP, in general? In the period between 2003 and 2007, average GDP was \$12.4 billion with a rate of growth of 133,763.83 percent.

### The Top Five

Hughes Communications Inc. was named the fastest growing company in North America. Hughes Communications had a revenue growth rate over five years of 138,762 percent, moving from revenues of \$699,000 in 2003 to \$970,648,000 in 2007. Based in Germantown, Md., Hughes Communications is a publicly held provider of broadband networks and services. This is its first appearance on the Fast 500 ranking.

Ticket Software LLC, a Vernon, Conn.-based privately held software company, came in second on the 2008 Fast 500 listing. Ticket Software, a company that provides software solutions for the ticket industry, reported revenues of \$83,760,000 in 2007, increasing 111,580 percent from 2003 revenues of \$75,000. This is its first appearance on the Fast 500 ranking.

Starent Networks Corp., a publicly held communications/networking company based in Tewksbury, Mass., came in third on the 2008 Fast 500 listing. Starent Networks provides networking solutions for mobile operators to provide multimedia services to their customers. The company reported revenues of \$145,797,000 in 2007, a leap of 80,008 percent from 2003 revenues of \$182,000. This is its first appearance on the Fast 500 ranking.

Abraxis BioScience Inc., a Los Angeles-based publicly held biotechnology/pharmaceutical company, came in fourth on the 2008 Fast 500 listing. Abraxis BioScience, which provides progressive therapeutics and core technologies that offer patients and medical professionals safe and effective treatments for cancer and other critical illnesses, reported revenues of \$333,686,000 in 2007, an increase of 77,682 percent from 2003 revenues of \$429,000. This is its first appearance on the Fast 500 ranking.

Pure Digital Technologies Inc., a San Francisco-based privately held computers/peripherals company, is the fifth-ranked company on the 2008 Fast 500 listing. Pure Digital Technologies, which develops simple and affordable digital imaging solutions for the mass market, reported revenues of \$54,616,000 in 2007, an increase of 44,667 percent from 2003 revenues of \$122,000. This is its first appearance on the Fast 500 ranking.

### Can Large Tech Companies Also Be Fast Growers?

The number of billion-dollar companies listed on the Fast 500 continues to grow, proving that nimbleness is not at all limited to the small and the young. This year, we had 20 businesses—18 public and two private—that reported more than \$1 billion in revenues. This up from 17 last year and 13 the year before.

Who are these companies? Apple Inc., ranked number 451, reported \$24 billion in revenues this past year. It's the company's first appearance on the Fast 500. Google Inc., number 179, had revenues of \$16.6 billion. It has been on the Fast 500 list since 2004, when it was the number 1 ranked company on the list. Other top billion-dollar businesses on the Fast 500 include Genentech Inc., Yahoo! Inc., Research in Motion, Symantec Corporation, Juniper Networks, VIZIO Inc., Netflix, Inc. and XM Satellite Radio Holding Inc.

Three of the billion-dollar companies, Google, Inc., Sepracor, Inc. and Research in Motion, have been consecutive Fast 500 winners for five or more years.

Of the billion-dollar companies on this year's Fast 500, five have more than doubled their revenues in the last five years:

- Google Inc.'s revenues have increased 17 times.
- Research in Motion's revenues have increased 14 times.
- Juniper Network's revenues have increased 11 times.
- Gilead Sciences, Inc. and Biogen Idec Inc.'s revenues have increased four times.
- SanDisk Corporation, NII Holdings, Inc. and Sepracor Inc.'s revenues have tripled.

Additionally, 53 percent, or 264 companies on the Fast 500 list are publicly held, up from 52 percent, or 259 companies, last year and 49 percent in 2006. Six of this year's Top 10 companies are publicly traded.

### Revvig Up the Growth Machine for the Long Haul

Because the Fast 500 list measures growth, not revenues, sustaining growth year after year—even as the baseline year increases—and remaining on the list is quite a feat.

Eight of last year's Top 10 companies made the 2008 Fast 500 ranking, and four previous Number 1 companies—Sirius Satellite Radio (2007), Occam Networks, Inc. (2006), Nuvasive Inc. (2005) and Google (2004) are on this year's list. Altogether 264 of the 500 companies are repeat winners.

Our longest running Fast 500 participant? Gilead Sciences. With revenues of \$4.2 billion in 2007, the life sciences company based in Foster City, Calif., has appeared 10 consecutive years on the Fast 500 ranking. Research in Motion is a nine-year repeat winner, and OmniVision Technologies, Inc. and United Therapeutics Corporation have been on the Fast 500 list for eight years. Other billion-dollar Fast 500 companies who are repeat Fast 500 winners include Yahoo! (six times); SanDisk and Google, Inc. (five times); NII Holdings, Inc., Juniper Networks and Biogen Idec, Inc. (four times); Symantec Corporation (three times) and MetroPCS Communications, Inc., Netflix, Inc., and XM Satellite Radio Holdings, Inc. (twice).

### Innovation and Growth: It's All About Risk for VCs

By virtue of being on the Fast 500 list, these companies have proven track records in the marketplace. Most started with the assistance of venture capitalists who believed in the innovative technologies and management abilities of these businesses, nurturing them as they got off the ground.

Against the backdrop of today's economy, the reality is that entrepreneurs are going to find venture capitalists tougher to win over. With companies staying private much longer than they ever have in the history of venture capital, venture capitalists are more likely to be looking for later-stage deals, in which they will have quicker liquidity.

Both early- and late-stage entrepreneurs need to understand that it's all about risk for venture capitalists—specifically technology risk, market risk and execution risk. When times are good and markets are active, a VC will traditionally be willing to take a technology risk over a market risk. These days, however, you have to add the dimension of execution. If an investment is going to require a long time and a lot of money, the ability of the business to execute is as important to the venture capitalist as the technology itself.

So, to those entrepreneurs hoping for the funding that will propel them to the Fast 500, manage everyone's expectations, including your own, and build a solid company with a long-term sustainable competitive advantage.

## Three companies that are models of growth

These three Fast 500 companies successfully beat the odds and have some advice for companies as growth oriented as they have been.

### mValent

Ask Joe Forgione what it takes to be a CEO of a fast-growing young company and two words immediately come to mind: perseverance and patience. As the president and CEO of mValent, which creates automation software to streamline complex application infrastructure, Forgione's task has been to launch the company into the marketplace.

Founded in 2002, mValent spent its first three years in low-key tech mode, refining and testing its product, holding a couple of soft launches and then re-architecting based on the results. The point, says Forgione, was to wait until it could be launched when it was ready and not before that. "Everyone," he says, "including our investors, realized it was the right thing to do. It takes courage to say, 'We got it wrong. Let's go back and reinvest and build the right product.'"

Finally, in 2005, when Forgione joined the company, mValent launched. It had all of three customers at first and miniscule revenues. Forgione's mandate was to build a company that could go to market. "I had to develop the strategy and hire the leadership," he recalls. "One of the biggest decisions as a CEO is bringing in the right people, given the strategy for the company. And they have to be people who can grow with the company. We built those teams and functions to execute on a broader scale. It's all about having the right game plan and the right people."

It has also been about having the right investors. "Funding is a big issue for a start-up," acknowledges Forgione. "Venture capitalists select companies but companies also select venture capitalists. It's really important to have investors who are patient, understand your strategy and your space, and who are willing to be there during the bumps when you have to zig zag through market dynamics."

It would take mValent until 2006 before any significant revenues would be earned, and by 2007, the company enjoyed a huge revenue leap.

"There was no one 'aha' moment for us," says Forgione. "But in the fourth quarter of last year, we were all feeling pretty good. We had exceeded our expectations, we were closing customers in a shorter period of time than we had anticipated, and we were getting bigger deals. There were a number of unsolicited inquiries. But, it was a groundswell based on all the hard work we put into it."

One challenge at this new stage was to develop the right partnership. The partner mValent chose was Hewlett-Packard. "If you have to do everything yourself, it's more difficult to scale a company," says Forgione. "This year, we developed a strong strategic partnership with H-P. They're a global reseller of our product. But you have to be careful you don't do this too soon. If the market is immature, your own people don't yet understand what it takes to sell, so you can't train a large partner. When we were ready, we felt we could take our knowledge and translate it to a major partner so they could take us to the next level. We'd rather have one very effective partner that's successful than several competing with each other."

Today, the company has 33 customers, including UPS and State Street Corporation.

"It's a matter of doing all the fundamentals and doing them well," says Forgione. "It's still not easy. The challenge is to sustain that growth. There are always going to be different challenges every step of the way."

### ValueClick, Inc.

Measured growth would be the two words that best describe the route traveled so far by online marketing services firm ValueClick, Inc. ValueClick began in July 1997 as a line of business in Web-Ignite Corporation. In April 1998, the Internet advertising division of Web-Ignite was transferred to ValueClick, which became a newly formed company. Since its inception, ValueClick has been combining organic growth with strategic acquisition to create a holistic approach to the display advertising business, offering a suite of products and services that allows marketers to advertise and sell through products through all major online marketing channels.

In fact, CEO Tom Vadnais came to ValueClick in Oct. 2001, when ValueClick acquired Mediaplex, where he served as president. Prior to his arrival, the company went public in March 2000, listing on NASDAQ stock exchange.

Over the years, between its internal growth and acquisitions of companies like Commission Junction, PriceRunner, FastClick and shopping.net, ValueClick has created eight vertical areas of business.

Most critically, after the dot.com bubble burst, ValueClick made some acquisitions. Some, the company says, worked, while others, they acknowledge weren't as successful. But, they kept their expenditures modest. The approach has enabled the company to grow by entering both new market segments and expanding the customer base in existing segments.

## Bomgar Corp.

Five years ago when Joe Bomgar was an engineering student at Belhaven College in Jackson, Miss., he worked for a computer consulting firm. Every time something went wrong with his equipment, he'd have to drive it out to a repair shop or spend hours on the phone with tech support. Everyone knows how frustrating that is, but not everyone has the skills to develop the technology to enable computer professionals to connect directly to customers. Bomgar did. In his senior year, he wrote tech support software code that would allow any two computers anywhere in the world to connect, and started using that technology himself after graduation as a consultant. But he realized immediately that it was so powerful, he'd do better selling the technology itself. He and two college friends developed a product based on his code, put up a web site, put an ad on Google. Within four days Bomgar had his first sale. That was two months after graduation when Bomgar was 23 years old.

Today, Bomgar Corp. has more than 115 employees and reported \$12.1 million in revenues in 2007. Bomgar says his strategy for growth was simple: hire the right people and focus your resources on a single market opportunity.

"A lot of companies are constantly trying to introduce new products and end up struggling," Bomgar says. "We have a laser focus on our market so we're able to grow much more quickly than other vendors in the space. Do one thing and do it better than anyone else in the world."

Another factor that has led to the company's growth was its rebranding, which was done about a year ago. Originally called Network-Streaming, the company struggled with a name that was too difficult for people to remember. Someone, says Bomgar, suggested that they use his last name. It was short, unique and, as he says, had "verb" potential. "Now we have customers who say they'll 'Bomgar' in," he says. "It's out of control. It's brand building in real time. It's been unbelievably powerful."

Success for a small company can have its hazards as the business needs to scale up as sales increase. For Bomgar Corp., that period of retrenchment came as they moved from \$1 million to \$10 million in sales. "We found we needed a professional management team," Bomgar acknowledges. "The people we had in the beginning for the most part are still here but we needed really strong expertise in development, marketing, sales, and finance and operations. You come to understand that there are just some things you're not good at and can't learn fast enough, like enterprise sales. We couldn't learn how to sell to a Fortune 500 company immediately. We realized we had outgrown our abilities and had to get a heavy hitter for that. And that enabled us to continue to focus on those things we are good at.

"When you see entrepreneurs outgrow their ability to lead their company, it's not that they can't be an effective CEO, but that they think they can do everything when they no longer can. If you get good people in place and continue to do what you do best, you can continue to be the visionary and leader."

Bomgar believes his company's job is to have as big a piece of the pie of his market in the next three to four years and be in a position to take the company public if there's a compelling reason to do so. "We're trying to operate as a public company so that if it comes to that, we're ready and can flip the switch very easily," he says.

"In the last five years, we've been incredibly blessed. It looks like things are headed in the right direction. All we can do is be diligent with what's before us."

## On the Horizon: Rising Stars

Deloitte's Technology Fast 500 also recognizes North America's 25 fastest growing young companies. These companies on the rise have met the same criteria as the Fast 500 but have been in business three or four years. Revenue growth is based over three years (2003-2007).

### About Deloitte

Deloitte refers to one or more of Deloitte Touche Tohmatsu, a Swiss Verein, its member firms and their respective subsidiaries and affiliates. Deloitte Touche Tohmatsu is an organization of member firms around the world devoted to excellence in providing professional services and advice, focused on client service through a global strategy executed locally in nearly 150 countries. With access to the deep intellectual capital of approximately 135,000 people worldwide, Deloitte delivers services in four professional areas, audit, tax, consulting and financial advisory services, and serves more than one-half of the world's largest companies, as well as large national enterprises, public institutions, locally important clients, and successful, fast-growing global growth companies. Services are not provided by the Deloitte Touche Tohmatsu Verein and, for regulatory and other reasons, certain member firms do not provide services in all four professional areas.

As a Swiss Verein (association), neither Deloitte Touche Tohmatsu nor any of its member firms has any liability for each other's acts or omissions. Each of the member firms is a separate and independent legal entity operating under the names "Deloitte", "Deloitte & Touche", "Deloitte Touche Tohmatsu" or other related names.

In the United States, Deloitte & Touche USA LLP is the U.S. member firm of Deloitte Touche Tohmatsu and services are provided by the subsidiaries of Deloitte & Touche USA LLP (Deloitte & Touche LLP, Deloitte Consulting LLP, Deloitte Financial Advisory Services LLP, Deloitte Tax LLP, and their subsidiaries), and not by Deloitte & Touche USA LLP. The subsidiaries of the U.S. member firm are among the nation's leading professional services firms, providing audit, tax, consulting, and financial advisory services through nearly 40,000 people in more than 90 cities. Known as employers of choice for innovative human resources programs, they are dedicated to helping their clients and their people excel. For more information, please visit the U.S. member firm's Web site at [www.deloitte.com](http://www.deloitte.com)
